PROFILE SUMMARY:

Entry-level Data Analyst with experience analyzing business datasets and building dashboards using SQL, Python, Excel, and Power BI. Skilled in exploratory data analysis, KPI reporting, and translating complex data into actionable insights for stakeholders.

SKILLS:

Core Tools: SQL (PostgreSQL), Excel (Pivot Tables), Power BI, Python (Pandas, NumPy)

Data Techniques: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, KPI Reporting

Power BI: DAX, Data Modeling, Time Intelligence, Interactive Dashboards

SQL Skills: Joins, CTEs, Subqueries, Window Functions, Aggregations

PROJECTS:

Mobile Sales Performance Analysis | Power BI, Power Query

- Analyzed multi-city mobile sales to evaluate revenue trends using MTD, YoY, and SPLY metrics.
- Identified growth patterns across regions and time periods for strategic insights.
- Built interactive Power BI dashboard tracking revenue, product profitability, and regional sales.
- Used dynamic visualizations and slicers to monitor KPIs effectively.
- Applied DAX time-intelligence functions for period-over-period financial comparisons.
- Delivered actionable insights to support decision-making and performance optimization.

Customer and Product Performance Analytics | PostgreSQL

- Analyzed multi-year sales data to uncover revenue trends and growth patterns.
- Segmented customers into VIP, Regular, and New categories using spending and lifespan metrics.
- Assessed product and category performance to identify key revenue drivers.
- Created SQL reporting views with actionable KPIs including recency, AOV, and monthly revenue.

Customer Segmentation Analysis | SQL, Python, Power BI

- Segmented 3,900+ customers with SQL to identify high-value and repeat users driving revenue.
- Used Python (Pandas, NumPy) to uncover purchase patterns and revenue-driving customer segments.
- Built an interactive Power BI dashboard showing retention, revenue, and segment metrics.
- Delivered insights to guide marketing campaigns and improve customer retention.

INDUSTRY SIMULATIONS (FORAGE) :

Data Analytics Simulation — Deloitte

Aug 2025

- Analyzed structured business datasets to identify trends, inconsistencies, and data quality issues
- Applied analytical reasoning to investigate business problems and present insights clearly

Data Visualization Simulation — Tata Group

Aug 2025

- Translated business requirements into KPIs and dashboards
- Presented insights using Power BI-style visuals for non-technical stakeholders

EDUCATION:

Annasaheb Vartak College

Bachelor of Science in Data Science

Pursuing

SGPA: Sem 1 – 8.3 | Sem 2 – 8.8

CERTIFICATIONS:

Power BI for Beginners — Simplilearn

Jan 2026

Covered data modeling, DAX basics, and interactive dashboard creation for business insights.

Introduction to SQL — Simplilearn

Feb 2026

Covered SQL fundamentals including data querying, joins, filtering, aggregation, and database concepts.
